Correction to: Creating person-al space for unspoken voices during diagnostic medical imaging examinations: a qualitative study

Chandra Rekha Makanjee^{1*}, Anne-Marie Bergh², Deon Xu¹ and Drishti Sarswat¹

Correction to: BMC Health Serv Res 21, 954 (2021)
<https://doi.org/10.1186/s12913-021-06958-4>

Following publication of the original article [1], the authors identified an error in the References section and two errors in the citations due to a typesetting error.

The reference 24 and 25 should be exchanged.

The correct reference 24 and 25 should be:

24. Entwistle VA, Watt IS. Treating patients as persons: a capabilities approach to support delivery of person-centered care. *Am J Bioeth.* 2013;13(8):29–39. <https://doi.org/10.1080/15265161.2013.802060>.

25. Gilmore KJ, Pennucci F, De Rosis S, Passino C. Value in healthcare and the role of the patient voice. *Healthc Pap.* 2019;18(4):28–35. <https://doi.org/10.12927/hcpap.2019.26031>.

In the main text of the article, two citations should be corrected:

1. The citation at the end of the following sentence should be changed from [25] to [24].

The unconventional hyphenation of ‘person-al’ is an attempt to keep the focus on the person, based on their ‘best interests’ and ‘quality of life’ (p. 56) [23] and to emphasise the human capabilities of patients as persons, which, according to Entwistle and Watt, include ‘personal capabilities’ (p. 34) [24].

2. The citation at the end of the following sentence should be changed from [24, 25] to [25].

This serves as a reminder of the importance of focusing on the whole person, not only biomedical markers and technical procedures [25].

The original article [1] has been corrected.
