# Correction: Impact of removing prescription co-payments on the use of costly health services: a pragmatic randomised controlled trial

Pauline Norris<sup>1\*</sup>, Kim Cousins<sup>1</sup>, Simon Horsburgh<sup>2</sup>, Shirley Keown<sup>3</sup>, Marianna Churchward<sup>4</sup>, Ariyapala Samaranyaka<sup>2</sup>, Alesha Smith<sup>5</sup> and Carlo Marra<sup>5</sup>

**Correction to:** *BMC Health Services Research* (2023) 23:31. <https://doi.org/10.1186/s12913-022-09011-0>.

Published online: 13 March 2023

Following publication of the original article [1], the authors identified some errors in the reported study years:

Corrections (marked in **bold**):

1. Participants were individually randomized (1–1 ratio) to either be exempted from the standard \$5 charge per prescription item for one year (**2020–2021**) (n = 591) or usual care (n = 469). (Abstract under “Interventions”)
2. The primary outcome was length of stay (measured by hospital bed-days) within the year of the study (**1 Feb 2020 to 31 Jan 2021**) (Methods).

The original article [1] has been corrected.
